

## Higher Education Commission (HEC) Thematic Research Grant

### Project Title:

Poverty Alleviation through Entrepreneurship Education for Sustainable Development in FATA: A way forward

### Project Objectives:

The main goal of the project is to design and implement interventions to catalyse the stakeholders including business education providers, employers and government entities to work for the development of entrepreneurship in FATA. To build on this, following are certain goals of this project

- To collect primary data relevant to the development of entrepreneurship and its linkage with the poverty reduction in FATA
- To bridge the gap between the education providers and industries with the aim to develop a platform for the business graduates
- To provide quality inputs to the current curriculum with the aim to make it more market oriented
- To recommend policy inputs to the government entities working on youth development, poverty reduction and local businesses creation.
